## Horizon VMware Client For Mac

Jul 04, 2018 I would suspect that apple have added an extra security layer that Horizon clients were bypassing, and this is what's causing the issue - similar things happened with macOS 10. You can learn more about what's new with Horizon 7 v 7.6 here. VMware Horizon Client for Mac allows you to connect to your VMware Horizon virtual desktop from your device of choice giving you on-the-go access from any location. 11 and VMware eventually updated the client to work - version 3.4.1 was released with the release note.
